

## WELCOME TO THE DREAM PROJECT

DREAM aims to develop the competences of migrant adults, empowering them to adopt recycling practices and sustainable lifestyles. By leveraging the power of “edutainment” - a blend of education and entertainment - we are creating engaging digital animated resources that promote environmental awareness.

**Raising awareness:** Educating migrant adults about the importance of recycling and the principles of the circular economy

**Behaviour modification:** Encouraging sustainable habits through interactive and engaging learning experiences

**Resource development:** Creating digital tools and resources for blended learning, known as GAME, to facilitate understanding and application of recycling basics.

The success of DREAM is built on the collaboration of partners from Austria, Norway, Portugal, and Spain, ensuring a rich exchange of ideas and best practices, enhancing the project's impact across different cultural contexts.

## Pioneering sustainable change

As we embark on this exciting journey, we invite you to stay connected with us. Follow our progress on social media and join us at our upcoming international conference, where we will present and validate the relevance of our GAME resources.

## DISCOVER OUR INNOVATIVE EDUTAINMENT TOOLS

We are excited to announce that the DREAM Project has successfully developed a suite of innovative edutainment tools designed to promote sustainable behaviour, which will soon be available and accessible in English, German, Portuguese, Spanish, and Norwegian, making it easier than ever for migrant adults to engage with and learn about recycling and the circular economy.

We invite you to explore our edutainment tools and join us in promoting sustainable behaviour. Save-the-date for our dissemination conference that will be held in Lisbon on the 13th of September 2024, to access the tools and start your learning journey today.
