

EduChampions - Empowering Edupreneurship

3rd Transnational Project Meeting in Riga for the Erasmus+ Project EduChampions

Riga, Latvia - The EduChampions project held its 3rd Transnational Project Meeting in Riga on November 15th and 16th to discuss the progress made so far and to outline the upcoming steps for their project. The project aims to foster the edupreneur mindset among educators to act as champions for change and embrace learners' diversity through a combination of learner-centred pedagogies with purposefully used educational technologies.

The EduChampions project has achieved significant milestones, including the development of Edupreneurs Case Studies that highlight trailblazers who have successfully implemented new and innovative teaching approaches. These inspiring stories serve as a source of motivation and inspiration for educators worldwide, particularly VET trainers and teachers who are looking to redefine education and improve their teaching methodologies.

Furthermore, EduChampions is excited to showcase their comprehensive Learning Path, which guides educators through incorporating active, learner-centred pedagogy practices into their classrooms. This step-by-step roadmap empowers education consultants, strategists, and entrepreneurs with practical strategies and techniques to transform traditional classroom settings into interactive and inclusive learning environments.

To support the ongoing journey of these educators, EduChampions is developing an Online Learning Station & Toolkit. This digital platform provides educators with access to a wealth of tools and materials that enhance teaching methodologies and foster collaboration among VET trainers, teachers, and education leaders.

If you're a VET trainer, teacher, education consultant, strategist, entrepreneur in education, or education leader interested in joining the EduChampions movement, visit their website at <https://educhampions.eu/> to learn more and get involved.
