

Welcome to the third GUARDIANS Project Newsletter!

In this third edition of the GUARDIANS Project Newsletter, we're thrilled to bring you the latest updates on our collective efforts to equip healthcare professionals with the global competencies needed to thrive in an increasingly complex and interconnected world.

Training in Bastia

In the first week of April, the Institut Régional d'Insertion Professionnelle et Sociale hosted a 3 day Teaching Training Event in Bastia, France. Twelve adult and healthcare educators from each partner country came together to test and provide feedback on the newly developed learning content. This event marked a significant milestone in preparing our educators to deliver the GUARDIANS material.

Upcoming Workshops

Stay tuned! Hands-on workshops and local testing sessions are coming soon in each partner country. These will offer opportunities to engage with the material, provide feedback, and become part of the GUARDIANS learning community.

Project Progress & Updates

We're proud to announce that our Massive Open Online Course (MOOC) on Developing Global Competence is now fully developed and available on our learning platform! The MOOC features 3 engaging Introductory Modules and 6 WHO-Specific Competency Modules, designed to enhance the skills of healthcare professionals and educators across Europe.

Alongside the MOOC, you'll also find our Global Competence Coaching Toolkit, which includes three tailored modules to support trainers and adult educators in delivering this content effectively.

Explore both the MOOC and Toolkit now on our learning platform: <https://guardiansproject.eu/learning-platform/>
