The JIMINY's results

The JIMINY project was implemented from 2019 to 2022 by organisations from seven EU countries: Romania (ADES), Poland (CWEP), Greece (SYMPLEXIS), Portugal (Mindshift), Spain (InnoHub), Ireland (CCS) and Italy (LABC). The aim was to develop resources to train disadvantaged groups' members and adult educators on emotional intelligence, digital awareness and entrepreneurship lifestyle.

The two main tools developed are:

- **JIMINY Self-help Handbook** - a guide addressing the topics of the project and providing techniques to improve them. It is complemented by training plans and PowerPoint presentations for adult educators.
- **JIMINY Personal Trainer** - an artificial intelligence-driven tool that diagnoses the individual needs of learners and suggests them customised learning paths. The development of the required competences is done through 42 Action Cards.

Both results are available for free online in the seven languages of the partner countries.

JIMINY's journey

Short-term joint staff training event

A JIMINY training event took place in Valencia, Spain, from the 25th to the 29th of October 2021. Adult educators representing all the organisations participating in the project attended this event.

The aim of the training was to provide to the adult educators a deep understanding of the JIMINY Self-help Handbook and of the JIMINY Personal Trainer, so they could further use these training resources for the benefit of their learners.

Besides that, a special focus was given to how to organise training for disadvantaged adults. It was approached how to identify competences' gaps of trainees, practical exercises to use with them and how to properly evaluate learners.

The participants' feedback on the project results was very positive and based on it some improvements were subsequently made by partners to the training materials.

Multiplier events

During March 2022 all partners held final JIMINY promotion events in their countries. Each event counted, at least, with 40 stakeholders, reaching a total of 280 participants.

Among the participants there were disadvantaged adults, adult educators, social workers and other professionals from organisations in the adult education area.
