

NEWSLETTER 2

LOTUS

LOTUS integrates digital pedagogy, employability skills and personalised career guidance within vocational education and training to equip teachers and learners with the skills needed to build resilience and unlock their future careers.

Project Resources

As a result of the LOTUS Project, you can freely access:

- In-service training for VET professionals on digital pedagogy
- Career Management Toolkit for VET learners
- Online courses for resilience building (MOOCs)

Objectives

1.To support VET professionals to develop their digital pedagogy exploring how digital technologies can be used to best effect in teaching and learning.

2.To boost the personal and professional development of VET learners to support them to prepare; search and secure employment post qualifying

3.To develop a series of MOOCs to address resilience-building within the VET community for educators and learners using the 3P model of resilience - Personalisation, Pervasiveness, and Permanence.

Training in Lisbon

From 14th to 16th May, VET trainers from the partner organisations met in Lisbon to pilot the first version of the LOTUS In-service training programme. Hosted and facilitated by the experience team at Mindshift, the three day transnational training event was an excellent opportunity for trainers to test out the CPD materials, review the interactive infographics and find some time for mindful reflection. With the aim of building resilience in VET, the team at Mindshift struck the right balance between learning, networking, peer support and self-care. Feedback from all participants was hugely positive and from this basis, we are moving forward to the implementation of national pilot sessions with VET teachers from September onwards. If you are interested in taking part in the national sessions, contact your local partner and get involved.

Interactive Infographics

Over the summer months, partners are busy bringing the Toolkit of Career Resources for VET students to life addressing 3 core areas of career management skills: Prepare, Search and Secure. Stay tuned to see them on our website in September!
