

Netiquette

Fundamentals for fostering Netiquette in the Digital Age

“The internet is great because of the Netiquette we create. Participate and reciprocate.”

- David Chiles

In line with European strategic priorities, the project provides participating organisations with tangible innovative and high-quality results to address the key role played by Netiquette in adult learners' daily lives, educational settings and the workplace. It will also tackle common needs and challenging issues that have been exacerbated by the COVID-19 pandemic crisis in the participating countries, which uncovered the centrality of adult education and lifelong learning to foster digital readiness.

Considering the challenges and opportunities arising from digital transformation and the persisting inequalities and barriers constraining adult learners proficient, confident and responsible usage of digital technologies, the Netiquette+ project objective is twofold:

- To provide participating organisations with a set of tangible results to support adult educators in the process of mainstreaming and transferring relevant knowledge and skills on Netiquette;
- To foster low skilled adults' and adult learner's awareness, knowledge and skills to take part in the digital society critically, consciously and responsibly.
