

## Project SDG NAVIGATOR - Empowering changemakers towards sustainability

### FINALIZATION OF PROJECT RESULT 1

**The Sustainability Changemaker Competences Dictionary (SCCD)** is the first finalized project result prepared by project partners. It maps and expands on key competences for sustainability-driven entrepreneurship described in terms of knowledge, skills, and attitudes.

The SCCD is a resource designed **to support** VET learners, VET providers, business entrepreneurs and intrapreneurs, educators, consultants, and other stakeholders working towards sustainable development at the local and national levels. In the dictionary, you will find a set of core competences that are essential for sustainability change makers. **Competences are aligned with UNESCO Education for Sustainable Development Framework and GreenComp.**

It was developed in accordance with the **EQF (European Qualifications Framework) description elements**. This is a common European reference framework, which makes it easier to understand, compare and recognise qualifications across different countries and systems in Europe. The EQF covers all types and levels of qualifications, while the learning outcomes provide a clear view of a person's knowledge, understanding and capability. In the dictionary, competences are defined by EQF level description elements: **Knowledge, Skills, Responsibility and Autonomy**.

These competences are defined at different levels using **EntreComp – Entrepreneurial Competence System**. This is a framework that defines the competences and skills that individuals need to become successful entrepreneurs. It can be used by entrepreneurs, educators, policymakers and other stakeholders.

**The dictionary is available in 6 languages and covers competences:**

- i) **Sustainability awareness,**
- ii) **Systemic thinking,**
- iii) **Anticipatory thinking,**
- iv) **Normative agency,**
- v) **Strategic thinking,**
- vi) **Individual initiative,**
- vii) **Interpersonal action.**

## SECOND TRANSNATIONAL PARTNER MEETING

The project SDG NAVIGATOR partners organized their second project meeting via a virtual ability on 17<sup>th</sup> July 2023. The main aims and objectives, milestones, as well as management, upcoming reporting, quality assurance and impact, communication, and dissemination activities, in the sense of finalizing previous tasks and setting the starting point for the upcoming ones, were discussed.

The scheduled meeting responsibility relied on a partner from Slovenia. In line with that Chamber of Commerce and Industry of Slovenia invited the Slovenian company ZEOS to present their area of work and their good practices.

ZEOS is a non-profit organization that ensures cost-effective compliance with legal obligations on behalf of the participants to the joint scheme for the management of e-waste, waste batteries and waste grave candles. As ZEOS empowers individuals to become true agents of change towards sustainability through their different life roles and choices (workers, citizens, consumers) the presentation of his representative caused quite an interest in discussing sustainability topics in detail and potential cooperation in the future.

The project SDG NAVIGATOR is an Erasmus+ KA2 CP VET financed project. The project duration is 24 months, from 31.12.2022 to 30.12.2024 and will be implemented by partners from Lithuania, Portugal, Spain, Greece, Slovenia and Austria.

To communicate effectively with persons and organisations outside our consortium, the SDG NAVIGATOR project creates a social media presence. The project website has further details about the project, the outcomes, newsletters and events: <https://sdgnavigator.eu/>
